BOSCH SMART SYSTEM
CONNECTMODULE

# Connecting your e-bike to the Bosch eBike Flow app

A few steps to get your bike and GPS security (ConnectModule) running.

## 1 Create an account

- Download the **Bosch eBike Flow** app from the App Store or Google Play
- Create a free **Bosch ID** with your email address, or sign in with your existing account
- Verify your email address using the link in your inbox, and check your spam folder too
- Give the app permission to use **Bluetooth** and **location**

OLDER DISPLAY Riding an Intuvia, Purion or Nyon Classic? Download **Bosch eBike Connect** instead.

## 2 Connect your bike

- Make sure the battery is sufficiently charged and properly seated
- Switch on the Smart System using the display or the battery button
- Stay within 1 to 2 metres of the bike
- Pair the bike over Bluetooth in the app

## 3 Activate the ConnectModule

The ConnectModule is the built-in GPS tracker with theft alarm, tucked away behind the motor cover.

- The bike recognises the built-in module automatically, so no separate pairing or code is needed
- After pairing, go to **Settings** in the app
- Choose **Activate eBike alarm**
- Wait for the **eBike unlocked** message to confirm
- Set your notifications: a warning signal when the bike moves, a loud alarm on suspicious activity

### SUBSCRIPTION

GPS and alarm are included free for the first 12 months. After that **€ 4.99 per month** or **€ 39.99 per year**.

### WHERE IT WORKS

The alarm works in the EU, Canada, the US, Australia, New Zealand and South Africa.
